## FIELD NOTES

OWNER: Al Langenwalter

TYPE OF SURVEY: Boundary

LOCATION: Section 16, T4N, R28EWM

From information given by survey of G. Kimball for sub-division of Section 17, T4N, R28E and existing roads and fences erected following this survey, I set a 1" iron pipe to mark the section corner common to Sections 8, 9, 16 and 17 in said township and range. I then proceeded to set the  $\frac{1}{2}$  corner on the North line of said Section 16, T4N, R28EWM halfway between this pipe and the iron pipe marking the Northeast corner of said Section 16. Using these corners and the railroad spike which marks the Southeast corner of said Section 16, I proceeded to make the survey as shown on the accompanying map.

*C. H. Storms*
