NOTES

- △ FOUND MOUND OF STONE WITH MONUMENT ALONGSIDE. SINCE GROUND IS VERY ROCKY AND MONUMENT COULD NOT BE BURIED TO AN ADEQUATE DEPTH, I DROVE A 3/8" X 30" IRON PIN SEVERAL INCHES INTO THE ROCK AND SURROUNDED WITH A STONE MOUND. PLACED REDFIELD'S CORNER MONUMENT IN THE STONE MOUND.

NARRATIVE OF SURVEY

This survey was authorized by the Department of Natural Resources of the Confederated Tribes of the Umatilla Indian Reservation. The purpose of this survey was to recover or re-establish certain corners controlling the location of allotments and fee lands which will be affected by construction of the Meacham Creek Fish Habitat Improvements. Descriptions for right-of-ways and leases across properties are shown on separate maps.

It should be noted that no determination of the senior line on the West side of the township was made, this being unnecessary for this survey.

The present survey was made with 2 and 3 person crew using a Mac-II-H infra-red distance meter, Wild T-16 theodolite and steel tape. Bearings are based on solar observations taken near the Northwest 1/16th corner of Section 6.

During this survey, all required controlling corner monuments were recovered with the exception of those corner monuments destroyed by channel changes of Meacham Creek and construction along the Union Pacific Railroad. The positions of destroyed corner monuments were re-established, based on the C.E. Redfield record, as indicated.

West 1/16th corner common to Sections 6 and 7:
 Re-established corner position by single proportion measurement between the recovered 1/4 corner common to Sections 6 and 7 and the recovered Southwest corner of Section 6.
Southwest 1/16th corner, Section 6:
 Re-established by single proportion measurement between the re-established West 1/16 corner common to Sections 6 and 7 and the recovered Center West 1/16th corner of Section 6.
Center West 1/16th corner, Section 7:
 Re-established corner at the intersection of a line between the re-established West 1/16th corner common to Sections 6 and 7 and the recovered West 1/16th corner common to Sections 6 and 7 and the recovered West 1/16th corner common to Sections 7 and 18, and the Easterly projection of an old, straight and substantial fence line located West of Meacham Creek.
Northwest 1/16th corner, Section 7:
 Re-established corner by single proportion measurement between the re-established Center West 1/16th corner common to Sections 6 and 7 and the recovered West 1/16th corner common to Sections 7 and 18.
Southwest 1/16th corner, Section 7:
 Re-established corner by single proportion measurement between the re-established Center West 1/16th corner of Section 7 and the recovered West 1/16th corner common to Sections 7 and 18.

HISTORY OF SURVEYS

The sectional subdivision survey of this portion of Township 2 North, Range 36 East, W.M., was originally made by J.P. Currin and J.E. Noland, U.S. Deputy Surveyors, under Special Contract dated May 4, 1887.

In 1919, C.E. Redfield, Surveyor for the U.S. Indian Service, retraced the exterior boundaries of Section 6, 7 and 18, and recovered or re-established section and 1/4 corners. Redfield also subdivided Section 6, 7 and 18, using a modified form of the "Three Mile Rule". That is, instead of running lines to establish interior corners in east and west directions, Redfield ran north and south. Parts of Redfield's field notes are available in the Bureau of Indian Affairs' Realty Section vault at the Umatilla Agency. The field notes consist of several field books containing "rough" (and sometimes conflicting) field notes and sketches of allotment surveys made on the Reservation. Several field books appear to be missing as of December 1988. Field note references were found for Sections 6, 7 and 18, T2N, R36E, W.M..

No record of other surveys in Sections 6, 7 and 18 was found in County Surveyor's Office Records.
