Fnd C. Nail & Flasher per R5 2.74' South

**Narrative of Survey**  
 A survey to monument the described property. Survey commenced on October 14, 1996.  
 Instrument used was a Topcon GTS2-06. Four angles were observed by repetition for the traverse.  
 Bearings are Grid, Oregon Coordinate System of 1983, North Zone, and are based on observations from Athena NGS, theta < +1' 26" 23".  
 As was noted Map 90-011-A, and subsequent surveys, the distance from Main Street to the North line of Section 19 is 3.72 feet longer than the platted dimensions, which are vague.

The method used to calculate these dimensions was: to set North-South streets parallel to monumented Fourth Street; to set East-West Streets parallel to Main Street; using the dimensions of Railroad Addition, to set the North Lines of Railroad Addition to the currently accepted positions of section corners to the East and West; and to evenly proportion the excess distance between Main Street and Washington Street.  
 Monuments of record were found as noted.

- Found Section Corner as Noted
  - Found Quarter Section Corner as Noted
  - Set 5/8"x24" Rebar w/ Plastic Cap "OR 2166LS"
  - Found Monument as Noted
- [ Record per Reference Doc # ]
