REGISTERED PROFESSIONAL LAND SURVEYOR IN OREGON, WASHINGTON, ALASKA & IDAHO

March 22, 1996

Mr. Dave Krumbein, County Surveyor
Umatilla County Survey Department
3920 Westgate
Pendleton, Oregon 97801

Subject: GPS of certain corner points, Pendleton, Oregon.

Dear Dave:

Enclosed is a layout map copy and a set of Station Reports for the GPS work done recently for the County and City of Pendleton.

Certain station monuments are subject to disturbance by farming. Station monuments subject to disturbance are noted on the station reports. Our primary objective on this project was to provide a premark position usable for aerial mapping control, and I don't have the budget to reference station monuments which may be disturbed in the future.

Also, there are a number of gps stations near public land survey corners. The public land survey corners in these areas could be tied into the gps network with little effort at this time.

Enclosed is the billing for our gps services to the County. Let me know if you have any questions or comments.

Yours truly,

William R. Wells, PLS
