Note

Several miles of the Standard Parallel forming the South boundaries of the foregoing Townships were run and measured by me during the progress of the work done under my Contract. viz<sup>No</sup> 101 bearing date Aug 5<sup>th</sup> 1861

The course of the Standard, though somewhat variable, was about  $N 89^{\circ} 47' W$  and the chaining <sup>was</sup> generally long, varying according to the unevenness of the surface, from 80 chs to 80.60 chs.
