Instructions,

Land gently rolling

Good Grass

Soil 2^d rate,

The lands in this Township are very broken

The high Table Lands between the head waters

of the Omatilla River and Walla Walla, River

break off in a succession of ridges cut up with

many ravines,

The soil is uniformly 2^d rate, The Grass

is good,

No Water.

fact, and soon the land
will be worthless unless
put into Market,

The whole of the lands
embraced in Contract
No. 10, and the Addendum
may be considered as one
extended range of pasture lands.
A very small portion, ^{of} which
may be considered barren,
Compared with the whole a
very small proportion can
be cultivated to advantage,
because of the dryness of the
seasons, otherwise rich and
productive, The Walla
Walla River is a fine
stream of cold water, well
supplied with excellent
fish, Trout & Salmon.

The Valley along the river
 is rich and very productive
 but narrow until the river
 enters the N. E. corner of
 Township 5 N, R. 35 E, and the
 hills are high and very
 steep generally,

The other streams,
 Dry Creek & Pine Creek, pass
 through deep canyons
 with narrow bottoms,

What is known as Walla
 Walla Valley lies principally
 in Washington Territory; but
 some of the best lands are
 situated in the fractional
 Townships No 6 North of Range
 34. 35 & 36 East, here the land
 is level or gently undulating
 and the different streams
 above named afford fine opportunities
 for irrigation,
