

Township 3 N., R. 37 E., W.M.

Chains

A fir, 10 ins. in diam., bears N.14° E., 52 lks. dist. marked T.3 N., R.37 E., S.36, B.T.

A fir, 18 ins. diam., bears N.51°W., 1 ch.32 lks. dist. marked T.3 N., R.37 E., S.35, B.T.

The old Cor. of Secs. 35 & 36, a broken Basalt Stone, marked and witnessed as described by the Surveyor-General, bears W., 1 ch.25 lks. dist. I destroy all traces of this old Sec. Cor.

Land; nearly level and mountainous.

Soil; part arable, gravelly loam and stone; 2nd, 3rd & 4th rates.

Heavily timbered with pine, fir and tamarack, 10.50 chs. Dense undergrowth with pine, fir, tamarack, alder, willow, cascara, fern, pinegrass, huckleberry and bunchgrass, 31.00 chs. Good pasture land.

Mountainous; heavily timbered, or lands densely covered with undergrowth, 72.50 chs. July 28, 1900

Note: In retracing the S. Bdy. of Sec.35, for the purpose of reestablishing Cors. thereon common to two Secs., I discovered it to be defective in alignment as follows:
August 2: I run W. on S. Bdy. of Sec.35 and at 40.00 chs. set temp. $\frac{1}{4}$ Sec. Cor.; at 41.06 chs., the old $\frac{1}{4}$ Sec. Cor. bears N. 50 lks. dist.; at 80.00 chs. set temp. Cor. of Secs. 34 & 35; at 80.61 chs. the old Cor. of Secs. 34 & 35 bears N, 82 lks. dist., therefore I continue my line W. and at 5 miles no chs. and 34 lks., fall 1 ch.84 lks S. of the Cor. of T.3 N., R.36 & 37 E. and as these Tps have not been subdivided, I resurvey this portion of the S. Bdy. as follows:

Aug.6: At 7 h,30 m A.M., l.m.t., I set off 45°41'30" on the lat. arc; 16°45' N. on the decl. arc and determine a true meridian by the solar at the Cor. of Secs. 35 & 36.

Thence I run;

N.89°44' W. on a true line S. Bdy of Sec.35.

Descending steep stony hill, thru heavy timber and undergrowth, bears N.30°W., and S.30° E.
