<hr/> -----GENERAL DESCRIPTION-----		
<p>This fractional township is very rough and mountainous. There are several fertile pieces of land in Tamarack basin and along the Walla Walla River, but on the whole the land is suitable only for grazing purposes. The entire region is covered with a nutritious growth of bunch grass.</p> <p>Timber is very scarce. In addition to Tamarack Basin in Secs. 13 & 24, there are several patches of heavy timber in Secs. 14 & 23. Other sections are covered with a scattering growth of pine, fir, tamarack, cottonwood in ground along the Walla Walla River.</p> <p>The country is well watered by the Walla Walla River and its tributaries.</p> <p>There are two homesteads in Sec. 11, and several prospective claims in other sections.</p>
