

Resurvey of portion of the Subdivisional Lines of T. 4 N R 38 E.

Chains	Feet
	<p>A willow for the Closing Cor. described by the surveyor general is dead and the bearing trees described by the surveyor general are dead, but the stumps remain. I re-establish the Cor. at the same point as follows:</p> <p>Set a fir post 3 ft. long, 4 ins., sq., 24 ins. in the ground for Closing Cor. for T. 4 N Rs. 37 & 38 E., marked C C T 4 N on S., R 38 E S 6 on E. and R 37 E S 1 on W face; with 6 grooves on S, E. and W. faces, from which:</p> <p style="padding-left: 40px;">A fir, 14 ins. in diam. brs. S. 67° E., 44 lks. dist., marked T 4 N R 38 E S 6 B T</p> <p style="padding-left: 40px;">A fir, 14 ins. in diam. brs. S. 22° W., 63 lks. dist., marked T 4 N R 37 E S 1 B T</p> <p>July 20, 1905:</p> <p>At this Cor. I set off 20° 42' N. on the decl. arc; and at 12 h. and 6 m. l.m.t. observe the sun on the meridian. The resulting latitude is 45° 52' N. Thence I run, S. 0° 39' W. on a resurvey bet. Secs. 1 & 6, over rolling ground, through heavy timber and dense undergrowth.</p>
14.75	<p>A spring branch, 2 lks. wide, course S.E.</p> <p>Leave heavy timber and dense undergrowth, brs. E. & W.</p> <p>Thence descend precipitous S. slope.</p>
34.50	<p>Intersect the old $\frac{1}{4}$ Sec. Cor., which is a basalt stone, 15 x 14 x 8 ins. marked as described by the surveyor general. The tree described by the surveyor general as a fir, 16 ins. in diam. br. N. 46° W., 180 lks. dist., cannot be found. I re-established the Cor. at the same point as follows:</p> <p>Set a basalt stone, 16 x 14 x 8 ins. 11 ins. in the ground for $\frac{1}{4}$ Sec. Cor., marked $\frac{1}{4}$ on W. face, and raised a mound of stone, 2 ft. base and a ft and a half high, W. of Cor.</p> <p>Therefore the N. half of this line is 34.50 Chs. in length and brs. S. 0° 39' E. I continue the resurvey S.</p> <p>Descend over precipitous ground.</p>
77.25	<p>Intersect the old Cor. for Secs. 1, 6, 7 & 12, which is a basalt stone, 20 x 10 x 5 ins. marked as described</p>
