

Supplemental Field Notes, Subdivisions of T 4 N R 38 E., W.M

Chains	Feet
	<p>At this Cor., at 7 h. a.m., l.m.t. I set off 7° 26' N. on the decl. arc; 45° 48' N. on the lat. arc; and determine a meridian with the solar.</p> <p>I examine this Cor., and find it to be a basalt stone, 15 x 10 x 10 ins., set 10 ins. in the ground, and marked and witnessed as described in my original notes. It is not a "fir post, 4 ins. sq., 4 ft. out of ground," as described by William B. Douglas, Examiner of Surveys. When I re-established this Cor., I left the old fir post, which was badly decayed and the marks of which I obliterated, by the new Cor. as a means of identification by the settlers who were familiar with it. The Examiner of Surveys mistook this old post for the Cor.</p>
38.26	<p><u>Retrace of the $W\frac{1}{2}$ of the line bet. Secs. 19 & 30</u></p> <p>From the $\frac{1}{2}$ Sec. Cor., I retrace N. 88° 56' W. bet. Secs. 19 & 30</p> <p>I fall 15 lks. N. of the Cor. of Secs. 19, 24, 25 & 30. Therefore this $\frac{1}{2}$ mile is 38.26 Chs. in length and brs. S. 89° 10' E.</p>
	<p><u>Cor. of Secs. 19, 24, 25 & 30.</u></p> <p>In making my original returns, through clerical error, I failed to describe this Cor. as established by me. The following is a description of the Cor. as it now stands;</p> <p style="padding-left: 40px;">A fir tree, 24 ins. diam., marked as described by the Surveyor General.</p> <p>The bearing tree in Sec. 30 is still standing, and brs. and is marked as described by the Surveyor General. The other 3 witness trees are dead; in their places I marked the following trees:</p> <p style="padding-left: 40px;">A fir, 10 ins. diam., brs. N. 77° E., 125 lks. dist., marked T 4 N R 38 E S 19 B T;</p> <p style="padding-left: 40px;">A fir, 18 ins. diam. brs. S. 65° W., 65 lks. dist., marked T 4 N R 37 E S 25 B T;</p>
